

## Aman Spa

Wellness is more than being free from illness; it is a dynamic process of change and growth – a state of complete physical, mental and social wellbeing. The Aman Spa concept has been carefully curated with four pillars of wellness in mind: nutrition, movement, psychological health and bodywork.

The singular goal is to achieve the ideal balance – Integrated Holistic Wellness – for every guest. Treating the whole – the mind, body and spirit – by integrating ancient healing modalities with the best of modern science, Aman strives to provide guidance, support and knowledge in a journey that extends beyond the boundaries of our international Aman Spas. Our aim is for guests to leave empowered and renewed, with the tools and resilience to continue their wellness journey into their everyday lives.

## A New Spa Language

Ancient healing arts such as Ayurveda and Traditional Chinese Medicine are based on complex theories of the workings of the human body and mind.

Talk of chakras and energy can be off-putting when taken out of context. Yet when understood as part of the philosophy behind a traditional healing system, they reveal an intriguing new language for explaining how our bodies work. While understanding these theories is not a prerequisite to enjoying their benefits, Aman Spa aims to demystify this language. Please ask us if you wish to know more about the ingredients or modalities used in any of our treatments.

## Understanding Energy

The concept of vital or life energy is very common in traditional healing systems. In China this is known as *qi* while in Hindu philosophy – including yoga and Ayurvedic medicine – the Sanskrit word *prana* is used to describe this vital energy. Imbalances of this energy can be physical, mental or emotional and can lead to ill-health. Restoring the balance of energy flow is the main goal of many of these traditional healing practices

## Wellness Assessment

120 minutes

Guests will have a TCM based Wellness consultation, in-body analysis, a postural assessment to grasp the condition of the body inside-out.

This experience will allow guests to find the way to optimize their health and balance mind and body. Aman Tokyo wellness team will further guide the guests to necessary sessions and treatments accordingly.

Wellness assessment will include below:

### 1. Wellness Consultation

A primary characteristic of most traditional medicines is to treat any health condition by addressing the body as a whole.

During a Wellness consultation at Aman Spa Tokyo, our specialist will conduct a thorough health evaluation by discussing, not only primary health concerns, but all elements of an individual's wellness and lifestyle based on Chinese Medicine theory. Visual clues about the body and facial features as well as the pulse and tongue, and directed detailed questions will all be factored in order to give extensive recommendations pertaining to all aspects of wellness, including treatment, fitness, and lifestyle recommendations.

### 2. InBody Analysis

The In-Body machine is designed to analyze all elements of body composition for an in-depth understanding of the state of health of the physical body. In-Body measures body weight, body mass index, body fat percentage, and muscle mass, as well as visceral fat percentage and extracellular water retention. These readings will enable formulation of a well rounded health routine to be created from the context of the medical, wellness, and fitness perspectives.

### 3. Postural Assessment

With the result of InBody analysis, in-depth postural assessment is based on the recognition that each person's body is unique and their physical regime different. The aim of the assessment is to help make informed decisions about how you choose to move, exercise and take care of your body. This is suitable for anyone embarking on a new fitness regime or experiencing recurring muscle or joint pain.

Postural alignment, strength and flexibility are analysed; strengths, weaknesses and possible areas of concern are identified; and the design of an individual programme suited to personal needs and goals is initiated.

### ***Shiatsu***

**60 / 90 minutes**

This intuitive massage technique is based on the same principles as acupuncture.

Pressure is applied to specific points on the body using the hands to restore energy flow. *Shiatsu* has many benefits – including improving muscle tone, facilitating proper joint alignment, stimulating blood and lymph circulation, regulating neural functioning, stimulating somatovisceral reflexes, regulating hormonal secretions, promoting correct posture, boosting the immune system, and reducing stress.

This treatment does not use oil.

### **Acupuncture**

**60 / 90 minutes**

Acupuncture involves the shallow insertion of tiny sterile threadlike needles into between five and twenty of the body's many acupuncture points.

This is a relaxing and painless treatment, commonly used for muscular tension, shoulder and back pain, arthritic pain, and headaches. However, it is also very beneficial in aiding circulation, boosting the metabolism and immune system, and strengthening digestion.

Acupuncture treats many conditions including stress, reproductive disorders, respiratory and digestive conditions, as well as a variety of other health concerns.

### **Facial Cosmetic Acupuncture**

**60 / 90 minutes**

This treatment combats ageing and provides an instant natural facelift by releasing tension in the neck, shoulders, face and scalp.

Fine needles stimulate the derma, encouraging collagen production and cell regeneration. Circulation is also increased – helping to improve the appearance of age spots, wrinkles and sagging.
