AMAN SPA

Wellness is more than being free from illness, it is a dynamic process of change and growth, a state of complete physical, mental and social wellbeing. Aman's spa concept has been carefully curated with four pillars of wellness in mind - nutrition, movement, psychological health and bodywork - with the singular goal of achieving this ideal balance of Integrated Holistic Wellness for every guest.

Treating the whole - mind, body and spirit - by integrating ancient healing modalities with the best of modern science, Aman strives to provide guidance, support and knowledge in a journey that extends beyond the physical boundaries of the globe's Aman Spas. Our aim is for guests to leave empowered and renewed, with the tools to continue their wellness journey, and the resilience and focus to put them into action.

A NEW SPA LANGUAGE

Healing has fascinated and compelled humankind since ancient times. Today, we have access to a treasure trove of traditional healing systems, as well as cutting-edge discoveries in modern medicine. Science can now prove the efficacy of certain ancient practices, while others, practiced today as they have been for millennia, offer benefits that are without scientific explanation.

Many of the world's ancient healing systems, such as Ayurveda and Traditional Chinese Medicine (TCM) are based on complex theories of the workings of the human body and mind. They incorporate aspects of health unexplored in allopathic medicine, so certain concepts can sound strange to the uninitiated.

Talk of chakras and energy can be off-putting when taken out of context. Yet when understood as part of the philosophy behind a traditional healing system, they reveal an intriguing new language for explaining how our bodies work.

Understanding these theories is not a prerequisite to enjoying their benefits, but Aman Spa aims to demystify this language for those wishing to know more.

Our spa menus draw inspiration from traditional healing systems the world over, from the rich lore of herbal medicine, to the shamanistic traditions of the Navajo Native Americans.

Please ask us if you wish to know more about the ingredients or modalities used in any of our treatments.

UNDERSTANDING ENERGY

The idea of a life force, or life energy, is shared among many traditional healing systems. In TCM this is known as “qi” (chi), while in Hindu philosophy, including yoga, Ayurveda and martial arts, “prana” is the Sanskrit word used to describe this potent vital energy. A principle in many healing modalities is that any blockage to the flow of life force within a body can cause imbalance and ill health. Blockages can be physical, mental or emotional, and their removal to restore balance and energy flow is the main goal of many traditional healing practices.

WELLNESS SERVICES

Wellness and Transformation Orientation by Holistic Expert

This is an opportunity to spend some time with one of our wellness experts discussing your particular needs and wellness goals. From this we can design a programme, tailor made, to give you the best possible wellness experience our team has to offer during your stay with us. Each programme combines spa and massage treatments, fitness and movement sessions, diet and lifestyle counseling, with our specialist therapies provided by our in-house holistic health practitioners. We also curate a personalised menu to ensure optimal nutrition during your stay.

Body Composition Analysis

Assess the health of your body in minute detail and gain a comprehensive view of your body composition, posture, and balance. The Fit 3D Proscanner uses cutting edge technology that provides the most accurate body composition measurements and analysis available today. It doesn't just analyse your muscle to fat ratio, it extracts the most important information from over 200 measurements to reveal a complete 3D visual image of body composition. A journey of physical transformation begins with this precision assessment, which is invaluable for developing and tracking the progress of any wellness or fitness programme.

Slimming, Detox and Anti-Cellulite Treatment

The powerful combination of radio frequency therapy, connective tissue massage and Asian style lymphatic drainage massage will effectively start melting away excess fat and cellulite in your body whilst simultaneously increasing circulation, clearing and tightening skin and generally detoxifying.

This treatment works well in conjunction with the Purifying massage ritual and three to five sessions are recommended for optimum results.

PHYSIOTHERAPY

Our 60-minute initial sessions comprise an in-depth consultation, movement assessment and postural analysis, as well as treatment. Our Physiotherapist will thoroughly discuss the symptoms you are experiencing, along with any concerns you may have. A follow-up appointment may be scheduled to check progress.

Physiotherapy Initial Consultation, Treatment and Pain Management

Physiotherapy can be used to treat a wide array of musculoskeletal conditions including sports injuries, fractures, spinal pain and headaches. Physiotherapy treatment may involve therapeutic exercises to improve strength, range of motion and endurance, and to correct postural and muscle imbalance. It may also include joint mobilisation manipulation and soft tissue massage, as well as stretching, trigger point therapy and dry needling to reduce stiffness and relieve pain.

High Intensity Laser Therapy

High Intensity Laser (HIL) Therapy offers a powerful and non-addictive form of acute pain management and is effective especially in treatment of sports injuries and lower back pain. Through a natural process of energy transfer, it significantly speeds up healing and tissue regeneration. HIL differs from Low Level Laser Therapy (LLLT) in that the higher intensity precise wavelength of the HIL allows for deeper tissue penetration.

Radiofrequency Therapy

This gentle yet effective therapy uses radiofrequency energy to denervate neural tissues within the peripheral nervous system to reduce pain caused by musculoskeletal disorders. It is a minimally invasive alternative to surgery and a cost-effective option in the chronic pain continuum of care.

Ultrasound Therapy

Therapeutic ultrasound is a modality often used by physiotherapists to help reduce local swelling and chronic inflammation. The most common conditions treated with ultrasound include soft tissue injuries such as tendinitis, non-acute joint swelling and muscle spasms. Most muscle and ligament injuries can benefit from therapeutic ultrasound.

Sport Rehabilitation

Rehabilitation programmes are designed for individuals suffering from acute or chronic injuries, or those in post-surgery states recovering from lumbar or cervical discectomy, joint replacement, and shoulder and knee conditions including rotator cuff, meniscus and ligament repair.

EARTH'S APOTHECARY

Aman Skincare is a new line of all-natural products which draw on the knowledge and wisdom of ancient wellness traditions while harnessing the power of nature. The rare and precious ingredients used in our skincare products include actives such as argan stem cells, Kalpariane™ seaweed extract, silk aminos and hyaluronic acid, and essential oils ranging from sandalwood, amber, rose and palo santo, to juniper, jasmine and tuberose. Other key ingredients are botanicals such as make, arnica, honey and beeswax, minerals including amethyst and jade, and precious metal and natural composite powders of homeopathic silver, gold, copper and pearl. Evening primrose, moringa, calendula, sea buckthorn and rose hip oils contribute their healing power, along with alkalising, oxygen-rich spring water, rainforest muds, and wild-harvested butters such as babassu, cupuacu, shea and murumuru. Each ingredient is ethically sourced, often from Aman destinations, and used in its purest, most natural form.

Working holistically to nurture and enhance overall wellbeing, each product penetrates deep into the skin to nourish and rejuvenate, but also works on a deeper level, meeting emotional as well as physical need states. Grouped into three unique formulations that reflect three healing pathways back to wellness - Grounding, Purifying and Nourishing - the products contain ingredients with a molecular vibrational energy that works in sequence with the human body to promote change and return equilibrium. The physical benefits of each product are completely aligned with its ability to address emotional imbalance, together offering a holistic fine-tuning with tangible, long lasting results.

AMAN SIGNATURE TREATMENTS

The Aman Spa Signature Menu, available at every Aman Spa destination around the world, reflects the Grounding, Purifying and Nourishing formulations of the Aman Spa product range.

There are four treatments available within each formulation: Massage, Body Polish & Wrap, Face Ritual, and the Journey - encompassing all three treatments to greatly amplify their effects. Each treatment is tailored to the individual to target specific concerns and help attain personal wellness goals.

A deeply relaxing, mineral-rich Foot Ritual is a prelude to each treatment. This is also symbolic - an act of humble service that fosters trust, helping guests to fully benefit from the treatment.

GROUNDING

For those seeking reconnection, stillness and perspective, our deeply relaxing, meditative and regenerative Grounding pathway is a balm for the restlessness brought on by the frenetic pace of modern life.

Developed to promote inner peace and return body and mind to a state of harmony, our Grounding formulation promotes skin cell regeneration, while hydrating and plumping the skin to reveal a healthy, radiant complexion.

Active ingredients in our Grounding formulation include argan stem cells and hyaluronic acid. The former penetrate the skin's dermis to help protect and revitalise skin cells, improving elasticity and the reducing appearance of fine lines. The latter hydrates and plumps the skin, leaving it softer and smoother.

Our Grounding formulation also features essential oils of amber, sandalwood and rose. The first is an antioxidant that protects the skin from free radicals while relaxing brainwaves and helping ease anxiety and stress. Earthy sandalwood, an anti-inflammatory, soothes inflamed skin while calming the nervous system and inducing a meditative frame of mind. Harmonising rose rejuvenates, moisturises and reduces redness while promoting hormone balance and easing anxiety.

Other key ingredients include maca, evening primrose oil, wild-harvested babassu and cupuacu butters, amethyst and homeopathic silver.

Techniques include a Tibetan Ku Nye massage, meridian and acupuncture work, cupping, and kneading.

Recommended for normal to dry skin, including mature and dehydrated complexions. Ideal for treating stress, exhaustion, anxiety, jet lag, dry skin and hair, insomnia, tension in the lower spine and adrenal fatigue, as well as feelings of insecurity, rootlessness and the inability to switch off.

Grounding Massage

A Ku Nye full-body massage honours ancient Tibetan healing traditions to stimulate muscles, while a subtler massage energises the meridian system. This treatment incorporates cupping along meridian lines, acupuncture, kneading, and deep-tissue techniques. The body massage is followed by a Tibetan head massage that induces an even deeper level of stillness.

BENEFITS

- Moisturises dry skin, breaks up scar tissue and eases muscular tension
- Reduces chronic pain and improves athletic performance
- Dispels anxiety and balances the energy body

For those seeking lightness, breathing space and a fresh start, our Purifying pathway detoxifies, cleanses and strengthens the skin's defences while enhancing clarity of thought.

A powerful detoxifier, our Purifying pathway is refreshing, invigorating and energising. The products in this formulation deeply cleanse and tone normal to oily complexions, including congested, dull, stressed and blemished skin.

The second hydrates and plumps the skin, leaving it softer and smoother. The third, a trademarked antioxidant and anti-wrinkle agent, supports collagen and elastin production to preserve skin's elasticity and suppleness.

Our Purifying formulation also features essential oils of palo santo, juniper and sandalwood. The first is an antioxidant that encourages the production and rejuvenation of skin cells while helping to dispel negative emotions. The second is an anti-rheumatic that improves circulation and the removal of toxins while easing anxiety. Earthy sandalwood, an anti-inflammatory, soothes inflamed skin while calming the nervous system.

Other key ingredients include arnica, moringa and calendula oils, moisturising shea butter, homeopathic copper, and pearl powder.

Techniques include a lymphatic drainage, nerve point therapy, and nerve stimulation.

Recommended for treating bloating, low energy levels, dull skin, thyroid problems, post-illness exhaustion, headaches and migraines, as well as feelings of stagnation, heaviness and confusion.

Purifying Massage

This deeply relaxing yet revitalising treatment incorporates manual lymphatic drainage techniques and nerve point therapy on the back to balance the nervous system and promote the flow of waste products away from the tissues. BENEFITS

- Hydrates, brightens and firms skin
- Drains the lymph and releases tension
- Detoxifies to reduce the effects of pollution

Purifying Journey

This Journey targets purification on every level, from clearing the skin and detoxifying the body's organs, to removing negative energy and focusing the mind. The techniques used in this pathway are geared towards healing. They include a chakra-balancing massage, mantra music, marma point therapy, and the Light Technique - based on the shamanistic principle that luminosity is generated from three points on the face.

- Treats rosacea and dermatitis
- Improves the look of scarring and pigmentation

Pilates

Muay Thai

Step into our professional Muay Thai Boxing Ring for an authentic training experience. Also known as Thai boxing, Muay Thai is called “the art of eight limbs” because it combines the use of fists, elbows, knees and shins. Teaching basic self-defense and emphasising the importance of a healthy mind and body, Muay Thai is superb for building strength and agility while toning and conditioning muscles. After training in this martial art, the national sport of the Kingdom of Thailand, you will step out of our Amanpuri ring with a warrior’s strength of mind and body.

HIIT

High-intensity Interval Training (HIIT) is a form of cardiovascular exercise where one performs a short burst of high-intensity exercise followed by a brief low-intensity activity, repeatedly, for a set time period. These intense workouts begin with a rigorous activation and mobilisation of the major muscle groups and joints, followed by the HIIT regime that typically lasts under 30 minutes. Research has shown that HIIT significantly reduces fat mass throughout the body.

TRX Suspension Training

This workout leverages gravity and your body weight in a wide range of exercises. TRX delivers a fast, effective whole-body workout, helps build a rock-solid core and increases muscular endurance. Suitable for all fitness levels.

Circuit Training

Circuit training is a form of body conditioning using high-intensity aerobics. It targets strength building or muscular endurance. An exercise “circuit” is one completion of all prescribed exercises in the programme. When one circuit is complete, one begins the first exercise again for the next circuit. Traditionally, the time between exercises in circuit training is short, often with rapid movement to the next exercise.

Manual Holistic Stretching

An ideal addition post-workout, Manual Holistic Stretching assists in muscular recovery by releasing lactic acid built up during training. It helps to release tired, sore and stiff muscles, alleviate back pain and increase blood circulation. It is also very beneficial for releasing muscle tightness and limited range of motion due to ageing.

Abs, Core & More

This session is specifically designed to train the core region throughout the three planes of motion, concentrating on the psoas, abdominals, pelvic floor, lower back and upper-body. Specific attention is paid to healthy activation and function in both lengthening and shortening phases of muscle contraction. Can also be enjoyed on the beach.

Weight and Resistance Training

Weight training is extremely effective for developing strength and if desired, increasing the size of skeletal muscles. Not just for men or those looking to body build, weight training can be focused in many ways. Ask our personal training experts about hypertrophy training vs power lifting vs strength training.

Stability Training

Stability training refers to performing exercises while on an unstable surface with the goal of activating stabilisers and trunk muscles that may get neglected with other forms of training. During this full-body integrated, core-building workout, the deep muscular fascial slings of the body are activated.

Power Plate

Standing on a Power Plate while working out, your muscles are stimulated via vibrations to contract and relax up to 30 to 50 times per second, rather than the standard once or twice per second on the ground. The vibrations cause an automatic reflex muscle contraction and activation of multiple muscle groups simultaneously. This means that 10 minutes on a Power Plate is said to be equal up to 60 minutes of conventional training.

Aqua Aerobics

Ideal for increasing cardiovascular fitness, boosting bone strength and improving range of movement, this class utilises the natural resistance of water and additional foam weights to offer a full-body workout with zero stress on the joints.

YOGA

Yoga can be what you want it to be. For some it is purely a physical pursuit, keeping the body toned, strong and flexible. For others, it is also a mindset and a way of living. Sessions are tailor made to your level, from novice to yogi alike.

Hatha

A gentle introduction to basic yoga postures, hatha yoga leaves you feeling more flexible, longer, leaner and more relaxed. Poses are held for a significant time to allow a better mind and body connection.

Vinyasa Flow

This class is known for its fluid- and movement-intensive practice. It helps expel toxins and re-energises the body. Mentally, the synchronised breathing relaxes the mind and helps release any blockage of energy flow throughout the body.

Laughter Yoga

Just fifteen minutes of laughter yoga compares to sixty minutes on a treadmill. The benefits are endless when we stop taking life so seriously and laugh ourselves fit. Boosting cardiovascular, lung and respiratory health, laughter lifts the facial muscles, changes your mood, improves your posture and brings people together. An ideal family activity.

SUP Yoga

An uplifting, challenging and exhilarating experience, SUP yoga sees you on your own SUP out on the calm waters of Bangtao Bay. Your yoga teacher will lead you through a session customised to your level. Taking balance to another level, the beauty of this experience in the great outdoors is as beneficial as the postures themselves.

JUNIORS

Natural Coconut Oil Massage

A soothing full body massage using local coconut oil. Deeply relaxing and ideal for dehydrated skin.

Fresh Coconut Body Polish

Relaxing and rejuvenating, this natural coconut body polish with rice bran and sesame seeds leaves the skin wonderfully soft and moisturised.

After-Sun Soothing Ritual

Ideal for sun-touched skin, this soothing ritual begins with a soak in a warm milk bath, after which a cucumber aloe mask cools, heals and soothes the skin. Finally, a nourishing yoghurt-banana body wrap is applied to replenish lost moisture.

Essential Tropical Facial

Fresh watermelon slices cleanse the skin before a banana and yoghurt mask hydrates, nourishes and restores radiance.

Aman Spa junior treatments are available daily from 9.00am to 3.00pm. Children aged 6 - 14 years old are welcome with adult supervision

Swimming Lesson

Lessons can be arranged for children from 4 years old, teaching them important safety skills and building their stamina, flexibility and strength.

Introduction to Muay Thai (8 - 14 Years)

One of the central tenets of Muay Thai is an absolute focus on self-discipline and respect. A fun activity that inspires young people to keep moving and limit screen time, Muay Thai builds fitness and confidence.

Introduction to Yoga (8 - 14 Years)

Yoga is a great way to develop strength, flexibility and body awareness, as well as providing tools to manage stress through breathing and meditation. Yoga builds concentration, increases confidence and boosts a positive self-image.

FACILITIES

Juice Bar

The Juice Bar offers healthy refreshments with panoramic sea views. Whether you want a quick smoothie on the go, or a super shot to boost energy, we are delighted to offer great-tasting, super nutritious juices, shots and smoothies. Most of the menu is plant-based, gluten-free and organic where possible. Nothing is processed. If your favorite thing is not on our menu, just let us know. We will make it for you.

Infrared Sauna

Offering a host of anti-ageing health benefits, our infrared sauna emits infrared light experienced as radiant heat. This is absorbed by the surface of the skin and aids in detoxing, increasing cellular metabolism, and boosting the skin's natural healing processes.

Sauna

Much has been made of the health benefits of sauna, with good reason. Physically, nothing is more reinvigorating than a deep and healthy sweat. Tension fades. Muscles unwind. Mentally, you emerge relaxed, revived, and ready for whatever the day may bring.

Steam

The cleansing and relaxation benefits of steaming are well known. Amanpuri also offers herbal steam options, adding the healing properties of specific herbs.

Jacuzzi

The benefits of soaking in a Jacuzzi go way beyond relaxation. The bubbling hot water relieves muscle tension, eases aches and pains, improves circulation and promotes an overall feeling of wellbeing.

Cold Plunge Pool

Cold plunge pools have been used for thousands of years in TCM and were popular with the Ancient Romans. The cold water addresses muscle inflammation and facilitates recovery, and is extremely refreshing after a steam, sauna or Jacuzzi.
